Solution Architecture:

IOT Device:

- Getting the information from the application about the time and name of the medicines.
- Sending an SMS to the persons.
- Gathering the user information from the web application in which the user registers.

- To accomplish this, we have to complete all the activities listed below

Create and Configure IBM Cloud Services:

- Create IBM Watson IOT platform
- Create a device & configure the IBM IOT Platform
- Create Node-Red service
- Create a database in IBM Cloudant DB to medicine names and time.

Develop a web application using Node-RED service:

- Develop the web application using Node-RED.
- Develop a python script to publish the medicine names and time to remind details to the IBM IOT Platform.

Develop an application:

- Develop an application in which the user can feed the data on the medicine name and time.
- Develop an application which can transmit the signal on the reminder of the medicines at the time specified
